## STUDY

THE EMORY CHILDREN'S CENTER- VACCINE RESEARCH CLINIC IS CONDUCTING A RESEARCH STUDY TO EVALUATE THE RECENTLY FDA-APPROVED MATERNAL RSV VACCINE (ABRYSVO™) AND THE INFANT RSV IMMUNIZATION (BEYFORTUS™) ALONE OR IN COMBINATION IN MOTHER-BABY PAIRS.

### ELIGIBILITY:

- **Healthy Pregnant individuals between 18-45 years of age**
- **Must be planning to deliver at Emory University Hospital Midtown or Emory Decatur Hospital**

**SCAN THE QR CODE FOR MORE INFORMATION!**

### STUDY DETAILS:

- **4-6 clinic visits**
- **Pregnant individuals may receive RSV vaccine (ABRYSVO™) or their baby may receive RSV immunization (BEYFORTUS™), or both**
- **All mother-baby pairs will receive at least one of the FDA-approved products to prevent RSV disease in the baby**
- **Compensation for your time**
