

Help Us Study the Immune Response to MenB Vaccines

Emory Children's Center-Vaccine Research Clinic is conducting a research study looking at the immune response to a Meningitis B (MenB) vaccine in adults who have previously received a 2-dose Bexsero MenB primary series at least 2.5 years before enrollment.

Eligibility

- Ages 18 to 25
- Previously received 2-doses of the Bexsero vaccine at least 2.5 years ago
- Compensation provided

Study Details

- Up to 3 Clinic Visits over 2 months
- 1 dose of an FDA approved MenB vaccine (Trumenba or Penbraya)
